PROJECTS

Airline Reservation System

A website to book flights, select seats, and manage user accounts. This project helped users easily book flights online with a secure login system.

- Created web pages where users can search and book flights.
- Added a login system to keep user accounts secure.
- Built a database to store flight and booking information.

Library Management System

A website to manage books and lend them to users. This project made it easier to track books and manage lending efficiently.

- Designed web pages to add and track books.
- Implemented a system to lend and return books.
- Used a database to store book and user details.

INTERNSHIP

AICTE – Eduskills (Remote)

- Wrote SQL queries using SELECT, JOIN, GROUP BY, and aggregates.
- Learned database design, normalization, and indexing.
- Created simple reports to analyze data.

CERTIFICATES

- Red Hat Certified Enterprise Application Developer
- MongoDB Certified DBA
